Join the Blackbook.ai Team!

Blackbook.ai is one of Australia's most successful and progressive automation companies. Our use of RPA, Intelligent Automation and AI to deliver on our client's pursuit of bottom line benefits; has resulted in a company that can claim a 100% success rate in solution delivery. We have an agile approach to tackling problems. We understand that there isn't one solution for every problem! Our unique approach to problem solving will see you working directly with our customers, capturing additional requirements and developing intuitive solutions while drawing on the vast knowledge of existing team members.

The Automation Developer/Engineer role will see you working with multiple clients, projects and stakeholders. Internally, we have multiple teams that may see you working with Robotic Process Automation, OCR and Data Automation or Intelligent Automation. Your responsibilities will likely include the following:

- Work with internal solution analysts and business SMEs to ensure requirements are thorough and complete
- Address automation requirements to assess and deliver solutions
- Providing subject matter expertise/leveraging existing knowledge in the business on automation solutions
- Create solutions utilising best development practices

To be considered for the position, you will have experience or have been exposed to the following:

- Have an IT development background or a bachelor's degree in Information Technology (or similar)
- Strong problem solving skills
- Excellent professional presentation and communication skills (written and verbal, formal documentation, diagramming and modelling)
- Solutions focused and critical thinking skills
- Experience using agile project managements software like Jira or Trello

Highly Regarded:

- Knowledge of Automation or RPA and other similar emerging technologies
- Experience with Machine Learning or AI modelling
- Experience with Automation Languages (C#, PowerShell, SQL, VBA, Python, JavaScript, REST API)
- Experience with Cloud Infrastructure deployments/ design (Azure/ AWS/ Google)
- Experience with Cloud Apps (Azure/ AWS/ Google)

Blackbook.ai can offer a fast paced and collaborative delivery environment with an emphasis on culture and teamwork, ensuring all projects are delivered with our high standards. We have a large team of dedicated consultants able to work alongside and guide you through your RPA journey and offer on the job training and development with access to multiple certifications.

If you are looking to grow with our business by combining your energy and enthusiasm with Blackbook's solutions, please send us your details.

The application form will include these questions:

- Which of the following statements best describes your right to work in Australia?
- What's your expected annual base salary?
